GISCALE
NEW FUNCTIONS
AND NEW INTERFACE

Gi scale
ONE

&

Gi scale
PRO

**Control and visualize
your indicator from
the PC**

**Control your production lines
and all the
GI400-GI410 indicators**

Giscale is the ideal software for production lines with operator. The experience in multiple projects, working hand by hand with quality and production managers has resulted in this new version of Giscale.

The new Giscale maximizes the objective of helping to bring all levels closer to Industry 4.0. It provides objective data in real time to be able to detect any situation, favorable or unfavorable, helping to make concrete decisions and correct a possible negative deviation in daily production, improving productivity.

NEW FUNCTIONS
AND APLICATIONS

· New look, more **intuitive** menu **design** and **customizable configuration**

· Production control and **productivity**

· **Productivity summary** by operator, by scale, weighs performed, total productivity, % of product given away, etc.

· **More checkeigher** mode ranges for effective control

· Now with **import** and **export** of data and reports with configurable fields
